Allowable Subject Matter

1. Claims 2-23 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a device for judging the type of liquid inside a container. Each independent claim identifies the uniquely distinct features "a plate capacitor comprising two plate electrodes disposed opposite to each other, a container supporting means for holding a non-conductive container that contain a liquid, in a region other than the region sandwiched by the two plate electrodes" in combination with the manner claimed. The advantage of two plate electrodes disposed opposite to each other and not in the region sandwiched the container, to optimize the sensitivity of the plate capacitor with the container, regardless of the size of container or the amount of liquid contain in container. The closest prior arts, Burrows et al. [US 5,497,102], Cohen et al. [US 5,135,485], Firestone [US 2,285,152] and Rosemberg et al. [US 7,021,122] teach similarly system, but fail to teach the distinct limitation above. Therefore, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SON M. TANG whose telephone number is (571)272-2962. The examiner can normally be reached on 5/8.
